

Superheroes!

English

The children will be using superheroes as their focus. They will be designing and creating their own comics, writing a superhero story, creating excellent poems and making hero fact files.

P.E.

During our P.E. sessions we will be learning to move with control using both the floor space and apparatus. We will also create and repeat short dances.

Arts

The children will have regular opportunities to make and create drawings, paintings and models. We will be designing our own superhero vehicles. We will also be looking at Andy Warhol and exploring pop art.

During our music sessions, the children will explore different sounds and develop their skills in listening and identifying sounds.

Your help

Children need to be in line at 8.50am, please let your child enter the classroom on their own. They need to be picked up at 3.15pm outside the classroom in the infant playground.

Please ensure all items of uniform, P.E. kits etc. are clearly named. They do go missing!

We aim to change the reading books and listen to the children read in school two times a week (Monday and Wednesday). Please understand there may be the odd occasion where this may not be possible.

Similarly we appreciate your support in hearing the children read to you. It really does make a difference to their ability to read and write.

Our P.E. sessions are on Tuesday and Thursday. Please make sure your child has their PE kit in school.

RE and PSHE

We will be looking at both the topics of God and Incarnation and see how they relate to Christians and how they celebrate these things.

Maths

We will be looking at Place Value where we look at numbers, partition them and finding the 10s and 1s. We will also be looking at addition and subtraction and looking at how we can use our knowledge of numbers to inform our calculations. We will be looking at money and solving problems using money and our knowledge of numbers and calculations. We will also be looking at multiplication, looking at the patterns of numbers with the 2s, 5s and 10 times tables.

History / Geography

We will be looking at the history of real superheroes, finding out what they did and why they were super.

In Geography, we will be looking at physical and human geography using satellite images to help us.

Science and Computing

We will look at materials and how certain things need to be made from certain materials to be effective in what they do. We will also look at seasonal change and how our planet helps this happen.

The children will be using the iPads to create pop art style self-portraits inspired by Andy Warhol. They will be looking at e-safety, writing blog posts and using computers for Mathletics, Bug Club and Times Table Rock Stars.
